FRENCH  
MANUFACTURING

## Products and Services

# THE REQUIREMENT OF QUALITY

One step ahead

- Products assembled or designed in our workshops.
- All pumps are air and water tested.
- Guarantee: 5 years on resin motor, 2 years on our products.
- Quality components: Osram LEDs.
- Quadricolor packaging with expanded foam.
- We source materials with the highest requirements.
- Alarms meet the standard: NF P90-307 - 1: 2009.
- Products and principles patented in our main ranges.

## 3 KNOW-HOW & BRAND NAMES

**Weltico®** : lighting, pool fittings, filtration, safety.

**Vipool®** : equipment for technical shed, pumps, filters and filtration units.

**Jet vag®** : counter current, balneo solutions and water games.

# INDUSTRIAL EXPERTISE

One step ahead

## FRENCH DESIGNER AND MANUFACTURER OF POOL EQUIPMENT

Design innovative products, such is ACIS DNA.

Year after year, reinforcing our expertise in the different areas of pool equipment.

ACIS brings up solutions.

3 axes define us :

- Imagine and design
- Develop
- Sense of service

## RESEARCH AND INNOVATION

ACIS put brainpower at your service and each year brings evolutions products and new products. The proximity with your practical experience in the field as well as with your problematics feeds our creativity.

Our team of 6 engineers improve every year the products, ensuring also meet your needs. These products are real innovations, frequently with patents.

# MANUFACTURING

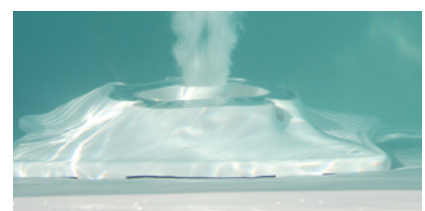

## TECHNICALITY

Teams trained for manufacturing our products in our factory: lighting leds, filtration (skimmers, skimfilters and twinfilters, saddle units, filter walls), counter current system, balneo and games.

We manufacture products in accordance with the specifications and all customizations could be examined.

Proximity between the definition of the product and its production guarantees its compliance.

# PROXIMITY AND SERVICES

## WEBSITE & SUPPORTS

A website [www.acis-france.com](http://www.acis-france.com) at your service: simplified view of the complete offer, quick and easy to navigate on mobile phones.

Content available through Pro access (technical sheet, photos, advice) available under registration.

Feel free also to ask for customizations of packaging and instructions.

On demand and anticipation with commercial department, we can make materials that match your style.

## EXPORT

ACIS makes a significant part of its activity abroad (almost 20%).

To strengthen this presence and improve the service, we have our own export department. Aurélie LE ROY is your privileged interlocutor and 100% dedicated to international customers.

Trilingual, she does all necessary for your orders for administrative procedures and relations with forwarders in these countries :

### EUROPE

Germany, Portugal, Belgium, United Kingdom, Spain, Netherlands, Cyprus, Italy, Austria, Switzerland, Croatia, Slovakia, Greece, Lithuania, Latvia, Hungary, Slovenia, Czech Republic, Poland, Sweden, Romania, Denmark.

### AFRICA

Senegal, Morocco, Chad, South Africa, Egypt, Tunisia, Cameroon, Algeria, Republic of Bahrain.

### MIDDLE EAST

United Arab Emirates, Qatar, Israel, Lebanon.

### OVERSEAS

### DEPARTMENTS AND TERRITORIES

Reunion Island, Guadeloupe, Martinique, French Polynesia.

### AMERICA

Mexico, Suriname.

### SOUTH HEMISPHER

Australia, Mauritius, New Caledonia.

### ASIA

Vietnam.

# Connected products

LoRaWAN is a telecommunication protocol allowing low speed communication, by radio, of objects with low power consumption communicating according to LoRa technology

# HYDRAPOOL

COMPLETE SOLUTION FOR POOL REMOTE MANAGEMENT  
FOR PROFESSIONAL AND PRIVATE

## NEW CONNECTED EXPERIENCE

ACIS has designed a complete solution, composed of a HYDRAPOOL box for installation in the plant room of a HYDRAPOOL Connect box to position near the internet box House and an application to monitor, control and secure installation of a pool.

The HYDRAPOOL application allows you control at 360 ° and 24/24 pool facilities regardless of their brand (without need for compatibility). With configurable alerts and customizable application, the solution meets everyone's needs. HYDRAPOOL will allow professionals to avoid unnecessary travel and follow-up their park management through real-time remote.

BUILDING  
&  
RENOVATION

## 1.IDENTIFY MEASURES

## 2.CONTROL THE DEVICES

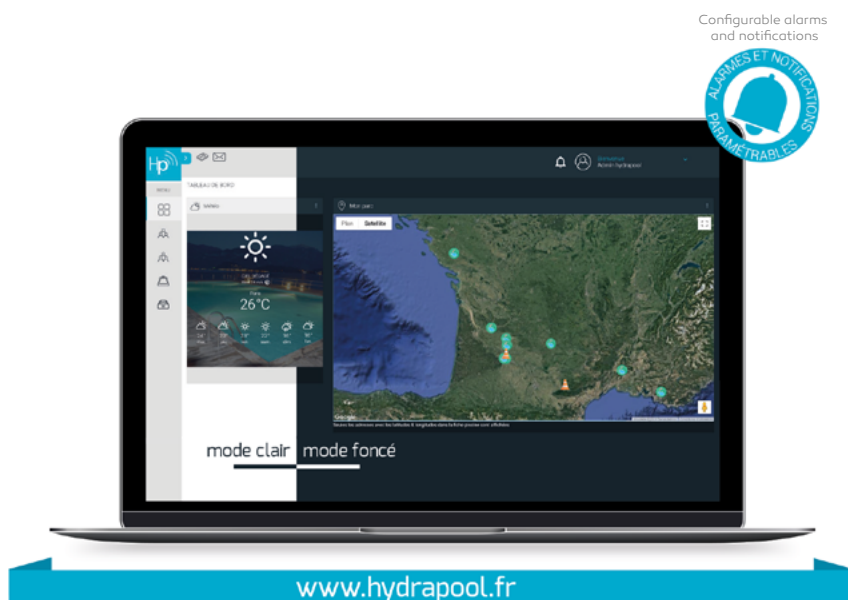

## 3.SECURE THE INSTALLATION

## CUSTOMISATION

### APP CUSTOMISATION

With your account, multiple profiles can be created, to offer you a use adapted and customized:

- choice in the visibility of devices and functions
- dashboard layout
- alarms and notifications
- light or dark modes.

**CONTROL ALL POOL DEVICES WITHOUT THE NEED OF COMPATIBILITY**

**FREE ACCESS TO THE APP**

**ACCESS IN REAL TIME 24 HOURS A DAY AND NO MATTER WHERE**

**USE DIRECTLY FROM THE HYDRAPOL BOX IN CASE OF A INTERNET WIFI BREAK DOWN**

## NEW 2020

- FILTRATION FORCED FOR 15 MINUTES AFTER PH INJECTION
- PRIORITIZED SERVOING
- TREATMENT CLOCK (WEEKLY PROGRAMMING)
- MANAGEMENT OF VARIABLE SPEED PUMPS
- 1 AUXILIARY OUTPUT

## PROFESSIONAL / INDIVIDUAL ACCESS

Professional and the individual can be unlink from the other at any time and easily

- A professional has an overview of the pool park from his computer or smartphone (iOS - Android).
- Alarms and notifications allow for pool park management without unnecessary movement and real-time tracking.
- It can associate or disassociate itself with an individual by a simple click.

- An individual can manage his pool, easily from his computer or smartphone (iOS - Android).
- Adjustable alarms and notifications ensure that the equipment in its swimming pool is safe and operational.
- The individual can also partner with a professional to entrust him with the management of his pool

### SECURED DATA

All data is secure, in accordance with The Rules of the "RGPD" A secure server 100% dedicated in OVH France

Management by an independent administrator (access, password, storage, data management)

## HYDRAPOOL SOLUTION IS COMPOSED BY :

- HYDRAPOOL Main Case
- HYDRAPOOL Connect box
- Air T° sensor
- Water T° water (with support collar ø50)
- Pressure sensor (with G1/4 union' - ø50 support collar with reduction M1/2 x F1/4)
- Access to web and mobile application, server, remote connection

# OUR LIGHTING FEATURE

We offer a range of lighting products ranging from light bulb to complete projector.

- French R&D, based on specialized engineering department.
- A French fabrication of projectors
- Made in our factory in St Philbert-de-Grand-Lieu (44).
- Quality components OSRAM Led components (Germany): proven quality.
- Energy saving.
- Very good luminous efficacy.
- Useful service life up to 50 to 100 times longer than a traditional light.
- Easy to install
- Low maintenance.
- A projector covered with 1 cm of resin for a perfect waterproofness.
- Optical collimator for exceptional lighting.
- Patent for heat dissipation.
- Interchangeable with most 300W PAR56-type lamps on the market.
- A new TUNABLE white or colour range to vary the shades of white and colours.
- 3 ranges and 4 colors to choose from to customize the projector.

# ASYS•LEDS

Atmosphere creation

Remote control of pool lighting on smartphone.

## FEATURES

- New Bluetooth management technology for controlling the Tunable range and traditional products (up to 10 lamps).
- Consists of a control unit and an application enabling to remote control the lighting.
- Easy to install and intuitive for the user,
- Control remotely on smartphone (no need remote control)
- Controlled directly on the box or via a smartphone.
- Personalization of programs and colors

- Free APP
- 2 independent outputs for projectors,
- Controls up to 10 lamps (360 W max),
- Customization of programs,
- Separate circuits, if required.

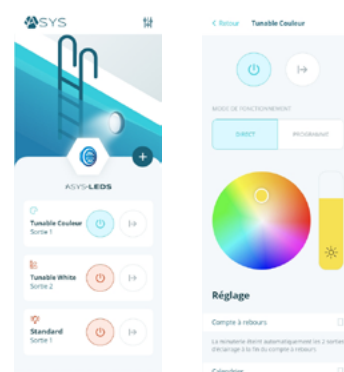

## COMPOSITION

- Separate bluetooth module
- ASYS application

## MAIN FUNCTIONS :

- Calendar (7 days, time slot),
- Timer (countdown),
- 15 pre-installed programs of your choice,
- Automatic shutdown,
- Direct color control,
- Dimming of light intensity,
- Information feedback and synchronization.

# NEW TUNABLE RANGE

New technology and collimator  
Remote control of lighting

## FEATURES

Weltico launches 2 new electronic cards and a new collimator.  
An Asysleds App enabling remote control, with Bluetooth.

This new range of bulbs allows

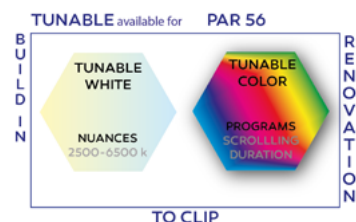

**IN WHITE TUNABLE RANGE** to play on :

- the shades of white from warm white to cool white,
- 2500 K to 6500 K – 860 to 2800 Lumens

**IN THE TUNABLE RANGE 12 COLOURS** to play on:

- color programs and animations,
- variations in light intensity.

Programmable as desired with colors, scrolling, duration...

new collimator

# PAR56 LIGHT BULBS

Diamond, Rainbow & Tunable

**HIGH POWER LED LIGHT BULBS WITH PAR56-STANDARD POWER, COMPATIBLE WITH ALL 300W POOL PROJECTORS ON THE MARKET. A GREAT CLASSIC THAT EVOLVES IN WHITE OR COLOUR TUNABLE TECHNOLOGY.**

- PAR56 Power LED bulbs, compatible with all PAR56 pool projectors.
- Classic or tunable collimators specially designed for optimized diffusion.
- Equipped with OSRAM power LEDs last technology that provide an exceptional light flow.
- APAVE certified
- 5 bulbs: 2 tunable models and 3 classic references 6 LEDs or 12 white LEDs and 12 LEDs for colors.
- New: Available in white or colour tunable technology (850 lumens -10 colors and 5 programs) (28W).

## STANDARD DIAMOND OR RAINBOW

- Exceptional luminous flux.
- 10 colors & 5 programs to choose from. The RAINBOW light bulbs are synchronized with each other to the mains frequency (with power-line communication), see Options p.31
- Lighting can be controlled by remote control ON/OFF, BPL, multifunction module or Asysled application (see p.31).

# DESIGN RENOVATION PROJECTOR

Evolution tunable.

**POWER LED PROJECTOR TO BE INTEGRATED INTO EXISTING RECESS FOR THE RENOVATION AND ENHANCEMENT OF THE POOL. TUNABLE TECHNOLOGY FOR EVEN MORE ANIMATIONS!**

## FEATURES

- New: Available in white or colour tunable technology (850 lumens -10 colors and 5 programs).
- Available in 6/12 white LEDs or 12 color LEDs without cable.
- 1 complete kit ready for renovation:
- Provided with 1 additional set of long-fixing clips to allow adaptation on most recesses (95% of recesses on the market).
- 1 additional seal for cable gland for several types of cable.
- 1 simple and universal connection system.
- 2 ABS DESIGN white covers: 1 round and 1 square provided.

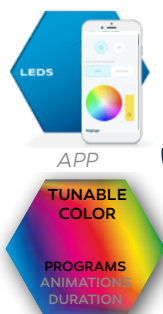

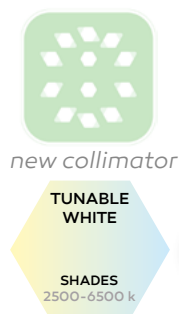

### STANDARD DIAMOND & RAINBOW

- Exceptional luminous flux.
- 10 colors & 5 programs to choose from.
- Lighting can be controlled by remote control ON/OFF, BPL, multifunction module or Asysled application (see p.31).

# NEW BUILD PROJECTOR

Elegance finish with cable and recess

**WHITE OPTICAL LED IN 6 OR 12 LEDS VERSIONS,  
OR 12LEDs COLOR VERSION. AVAILABLE IN TUNABLE  
TECHNOLOGY**

## FEATURES

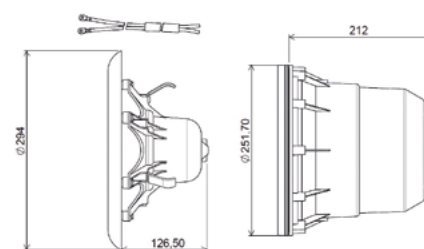

- White optical LED available in white 6-LED or 12-LED (Diamond) or color 12-LED (Rainbow) and now Tunable.
- Standard recess. 2 recesses to choose from : concrete/liner and panel/liner
- Ease of assembly and disassembly of the optical unit in/from the recess without tools.
- Delivered with: 1 white ELEGANCE cover (round) with 2.5 m of cable and a protective sheath for connecting to the terminal box (terminal box not provided).
- Available for concrete, concrete + liner, panel + liner and shell.
- Option of ordering the round cover of the desired color to match the pool.

### STANDARD DIAMOND & RAINBOW

- Exceptional luminous flux.
- 10 colors & 5 programs to choose from. The RAINBOW light bulbs are synchronized with each other to the mains frequency (with power-line communication), see Options p.31 + Asysleds.

## DESIGN finish

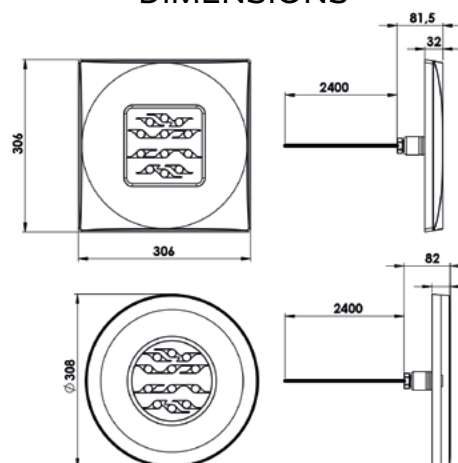

### PROJECTOR FOR 1"1/2 THREAD FOR RENOVATION OR CONSTRUCTION

#### FEATURES

- This new projector is suitable for construction or renovation thanks to its ingenious system. Patented fastening system.
- Equipped with OSRAM power LEDs: durability, economy and exceptional luminous flux.
- Resistant: monobloc projector is 100% resin and waterproof.
- Easy assembly: fits on all 1"1/2 sealing parts on the market.
- Available in version: 6/12 white LEDs or 12 color LEDs and with new tunable technology.
- Delivered with 1 round and 1 square covers DESIGN
- It is also possible to choose a colored cover to match the pool.

#### DIMENSIONS

#### + OPTIONS p.30

- Round or square Design covers white or color.

#### STANDARD DIAMOND & RAINBOW

- Exceptional luminous flux.
- 10 colors & 5 programs to choose from.
- Lighting can be controlled by remote control ON/OFF, BPL, multifunction module or Asysled application (see p.31).

# EASYLED EVO PROJECTOR

Ideal product for renovation or new-builds

**EASYLED EVO FASTENS TO 1.5" POOL FITTINGS.  
IT IS SUITABLE FOR ALL TYPES OF PROJECTS AND  
SWIMMING POOLS.**

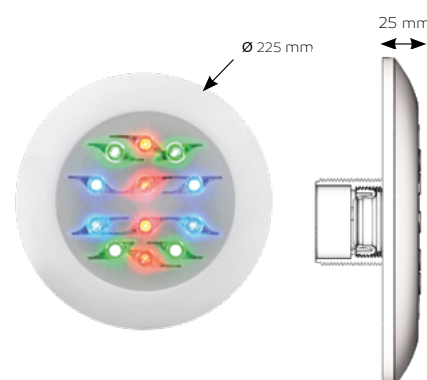

## FEATURES

Easyled EVO guarantees the perfect design and integration on different types of pools (concrete, concrete/liner, panel/liner, shell).

- Extra flat projector for a perfect, discrete finish: sits perfectly flat against the wall or liner (25mm without liner and 34mm with liner).
- Equipped with high power OSRAM LEDs: durability and savings + exceptional lighting.
- Patented fix system.
- Resistant and sustainable: the one-piece projector is 100% resin-coated and watertight.
- Easy assembly: attaches to all 1.5" fittings.
- For concrete and concrete / liner pools, we recommend using a wall penetration and vacuum port.

## DIMENSIONS

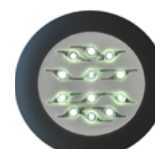

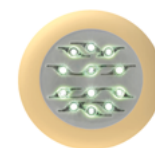

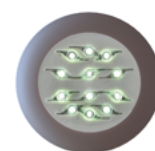

- Easy assembly kit including:
  - 1 x 2.4 m cable
  - 1 part to screw on threading 1.5",
  - 1 thickness-liner compensation spacer

\* vacuum port not included.

## Renovation or new-build mini projector

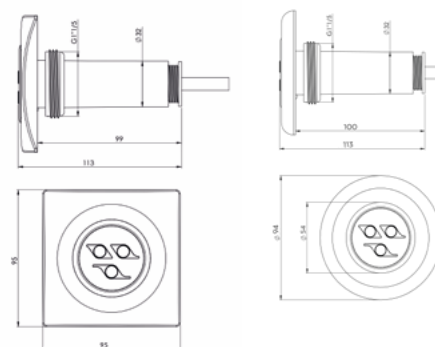

**NEW COMPLETE RANGE OF MINI PROJECTORS WITH  
LEDs FOR RENOVATION OR CONSTRUCTION OF  
SWIMMING POOLS AND ANY OTHER TYPE OF SPA  
INSTALLATION: BALNEOTHERAPY AREA, STAIRCASE  
RISER...AVAILABLE IN WHITE OR COLOR LIGHTING LEDs...**

### FEATURES

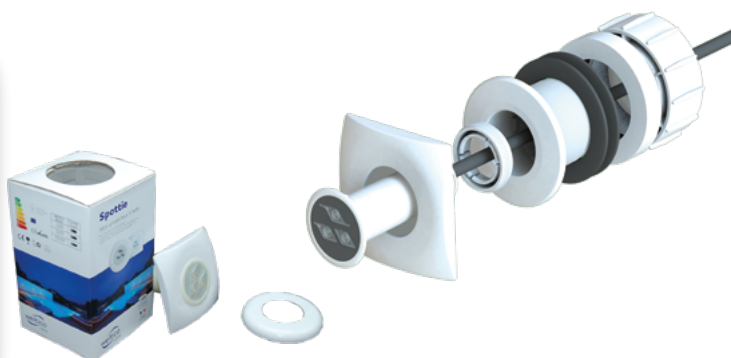

- 1 mini projector resin coated for perfect waterproofness.
- Mounting: 1"1/2 thread - patented system.
- Its diameter equivalent to a return nozzle makes it suitable for integration in any narrow or difficult to access space (stair treads or under a kerbstone).
- Available in versions: 1 or 3 white LEDs (respectively 7 W-550 lumens or 10 W-1020 lumens) and 9 color LEDs (10 W-250 lumens).
- Available for all types of construction and waterproofing.
- Possibility to order the cover in the desired range and color to match the pool.
- Adapted optical collimator.

### DIMENSIONS

### ASSEMBLY EXAMPLE :

- + • French manufacturing in our workshop.
- Resin and waterproof projector.
- OSRAM power LEDs.
- Delivered with cable (2.4m), DESIGN and Elegance white nozzle screw covers (square and round).
- Mounting on 1"1/2 thread type discharge nozzle or vacuum port.

## Lighting control

### ASYS LED APP 63290

NEW

- Remote control ambiance generator kit for white or color.
- Operates with Bluetooth.
- Can be integrated into any existing installation.
- Includes a 360 W/12V module that connects to the transformer.
- 1 remote control.

### BUTTON REMOTE CONTROL + BPL UNIT ASSEMBLY 63254

- For our RAINBOW projectors and light bulbs.
- Used to control up to 4 color projectors for synchronization and optimal control (front/rear and adjusting color programs).
- Unit to be connected to the power cable of the projectors at the transformer output.
- On/off.
- 2 buttons: fixed color rotation (front and rear).
- 2 buttons: program rotation buttons.

### ON/OFF REMOTE CONTROL UNIT 63254DI

- For white lighting.
- The ON/OFF remote control kit can be easily integrated into any existing installation.
  - This kit includes a module withstanding 1000W/5A to connect to the transformer power supply (220V) and a remote control.

### MULTIFUNCTION MODULE 810010-3

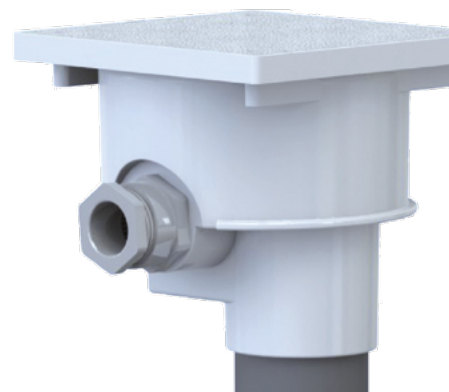

- Multifunction module with remote control. To operate white & RGB projectors
- 1 relay circuits A On/off
  - 1 relay circuits B impulse or On / Off
- Operating by :
- Electric piezo
  - Electric push-button
  - By push-button and pneumatic switch.

# SWIMMING POOL ALARMS

DISCREET .....	79
ALERT REPORT .....	79
IMMERSTAR .....	80
VISIPOOL .....	81

# SÉCURITÉ ALARMS

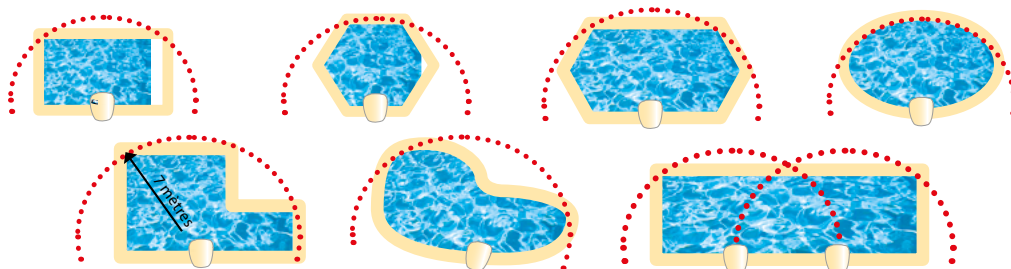

ACIS has made swimming pool immersion alarms in France for several years to current standards. Right from the start, all products are covered by a French certificate of compliance with respect to LNE (National Test and Metrology Laboratory) France's NF P90-307-1:2009 standard and Decree 2009-873 of 16 July 2009.

Our products have evolved over time. Successive improvements have been made and new products created to meet customer expectations.

## LAYOUT

ACIS alarms are designed for easy installation on most swimming pool types that should be protected (installation kits with nuts and bolts are supplied).

Detection in the swimming pool is optimum within a radius of 7 meters around the sensor. Beyond this range, the swimming pool should be equipped with one or more additional immersion detectors. These functional diagrams indicate typical configurations. For more details, refer to the installation manual.

# DISCREET

## Pressure sensor system

### FEATURES

- Monitoring: pressure sensor.
- Discreet unit under the coping.
- Fits to new and existing swimming pools.
- Operated by remote control and/or magnet.
- Automatic return to monitoring mode after swimming.
- Compatible with reel covers.
- Sound and light signals indicate monitoring mode.
- Inbuilt 100 dB siren.
- Powered by 4 alkaline batteries (supplied).

Box dimensions: 38.5 W x 34.5 H x 13.5 D cm

### PERFORMANCES

Product certified compliant with LNE (National Test and Metrology Laboratory) France's NF P90-307-1:2009 and Decree 2009-873 of 16 July 2009.

+

- Compatible with roller shutters and alarm report compatible.
- Discreet under the curbstone

# CARTRIDGE FILTRATION

weltico

**CHOOSING A CARTRIDGE FILTER MEANS SAVING MONEY, REDUCING ENVIRONMENTAL IMPACT AND IMPROVING PERFORMANCE.**

WELTICO cartridges and cartridge filtration solutions guarantee true filter media efficiency, thanks in particular to a combination of patented processes: maintaining fold spacing, ergonomic and hermetic handle, making handling easier.

Compared to conventional filters, cartridges provide a better filtration fineness (15 microns instead of 50 microns) and are much more water efficient for cleaning operations. Indeed, this operation requires only 20 liters of water to wash a cartridge (compared to more than 300 liters of water for a backwash filter). Ecology and savings!

In addition, the classic or antibacterial WELTICO cartridge filtration range covers all sizes and types of pools.

Discover all the advantages of TWINFILTRES® et SKIMFILTRES, optimized for new construction, WELFILTRES models for renovation and above-ground pools.

Finally, on the practical side, for ease of assembly and use, our filter wall, saddle block and skimbloc.

# CARTRIDGE FILTRATION RANGE C2 TO C7

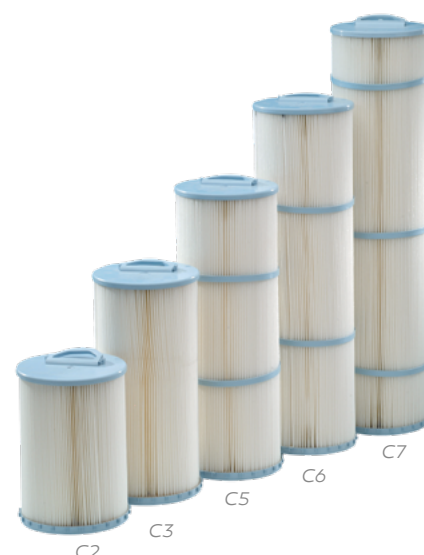

**WELTICO RANGE INCLUDES 5 CARTRIDGE SIZES (C2 TO C7)  
WITH FILTER SURFACE AREAS VARYING FROM 2.5 TO 7.6 M<sup>2</sup>.**

The polyester filtering medium provides a 15-microns degree of filtration.

For more efficiency, the cartridge is equipped with an exclusive, patented anti-clogging system that prevents the folds from sticking to one another.

- Product life: **1 to 3 seasons**, depending on pool usage and cartridge care.
- Filtering with cartridges is an environmentally-friendly, water-saving method.

Feel free to contact our technical and sales departments to ensure you achieve a perfect match.

- Made in France ;
- High capacity filtering cartridge for optimal filtration quality ensuring up to one month of service in peak season before cleaning;
- Patented fold spacing (using rings/comb);
- Patented handle with sealing cap ;
- Synthetic media ;
- Environmentally-friendly : easy, water-saving cleaning mode.

# NEW CARTRIDGE RANGE

## Antibacterial

**A COMPREHENSIVE RANGE RESERVED FOR PROFESSIONALS, WHICH IS 100% COMPATIBLE WITH WELTICO PRODUCTS**

- Range of 4 cartridges (C3 to C7) with dimensions that exactly match those of traditional cartridges for easy replacement.
- Synthetic, ultra-fine material which improves flow and features greater fibre density.
- Free flow core technology.
- Treated with an antibacterial agent infused within the fabric itself.
- Proven process: collects more debris and inhibits the growth of bacteria and mould that can block the cartridge, for more reliable, longer-lasting service.

- Perfectly adapts our cartridge filtration products
- Extremely fine filtration - 10 microns
- Clean half as often
- Handle
- Combination of a free flow core and Pleatco filtering material boosts the filtration capability and durability of our cartridges.

# SKIMFILTERS

A800, A600, A400, A300 & A200

**THE PERFECT COMBINATION OF A SKIMMER AND CARTRIDGE. A COMPLETE CARTRIDGE FILTER RANGE FOR POOLS 25M<sup>3</sup> TO 95M<sup>3</sup>**

Skimfilters combine a skimmer with a high performance cartridge filter. This very compact design simplifies installation by eliminating all pipes between the skimmer and the filter resulting in a very compact product. Available in Elegance or Design lines, and above all modular and customizable.

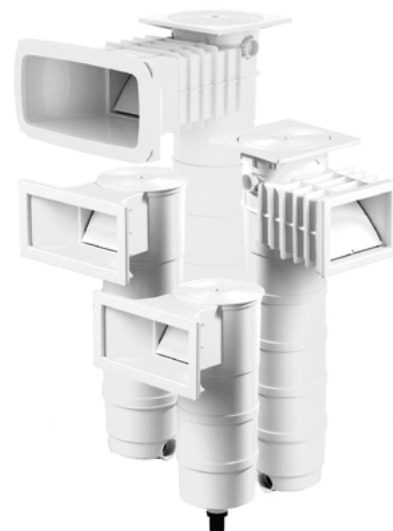

They have a reinforced structure and can be installed underground or in a filtration unit.

The A800 model completes your pool, sitting as close as possible to the coping and featuring an elegant design.

- The newest addition, the skimfilter A600, is an excellent compromise within this range.
- The A400 model (400 x 200 opening) features. It is equipped with two non-perforated overflows and a weir with a noise-reduction stop.
- Lastly, there are two compact models, the A300 (300 x 150 opening) for above-ground pools and the A200 (205 x 153) which is more compact and has no mouth.
- Customization on demand: loophole, orientation and exits of your choice.

# DESIGN SKIMFILTERS

## Compacts : A200-A300

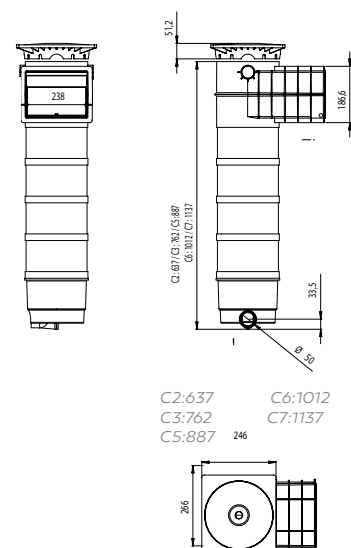

### FEATURES

- 2 models in this line that combine a skimmer with the contemporary look of the compact A200 to the A300 above Ground.
- 4 cartridge sizes to choose from, flow rate from 7 to 19 m<sup>3</sup>/h.

# ELEGANCE TWINFILTER®

Staged filters  
for 25m³ to 95m³ pools.

**A HIGH-END, HIGHLY EFFICIENT MODEL THAT OFFERS ALL THE ADVANTAGES OF CARTRIDGE FILTERS AND SIMPLIFIES THE CONSTRUCTION OF YOUR POOL.**

## FEATURES

- Compact, modular design.
- A first tank with high capacity 500-micron pre-filter bag to collect leaves and small debris.
- A second tank with high-capacity 15-micron filter cartridge for optimal filtration quality and a longer service life.
- Environmentally-friendly: easy, water-saving cleaning.
- Custom manufacture is available on request with another type of skimmer.

- Integrated filtration = no pipes for connection to the filter.
- Reliable vacuum operation.
- Can be assembled on a concrete, concrete/liner, panel/liner or shell wall.
- Integrated clogging indicator
- Environmentally-friendly
- Possibility of specific manufacturing on request with another type of skimmer, in DESIGN finish...

## COMPOSITION

1. Pre-filter
2. Filter
3. Cover
4. Water circulation
5. Pump connection

# SADDLE UNIT

No need to cut into the liner !

A PRODUCT WHOSE EASY INSTALLATION MAKES IT IDEAL FOR BOTH NEW AND EXISTING POOLS.

## FEATURES

- Inbuilt filtration and lighting sitting astride the pool edge.
- Easy installation, no need to cut out or through the structure.
- Max filtration: 22 m<sup>3</sup> /h
- Made in France, product inspected and tested before shipping.
- High tech and stylish: powerful DESIGN LED lighting, great swimming (optional), quality filtration, water-saving.
- Quality components: Powerful OSRAM LEDs, highly resilient pumps and patented cartridges.
- Optimised power and filtration for economical use.

## COMPOSITION

- Tank dimensions: 800 x 600 x 550 mm
- Lighting with 6 white LEDs + remote control
- 2 DESIGN direction-adjustable return nozzles
- 2 Weltico C3 cartridges (up to 50m<sup>3</sup>/h)
- 1 pump: PHT 15
- Heat pump bypass included.
- Electric box

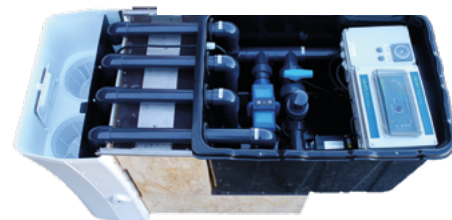

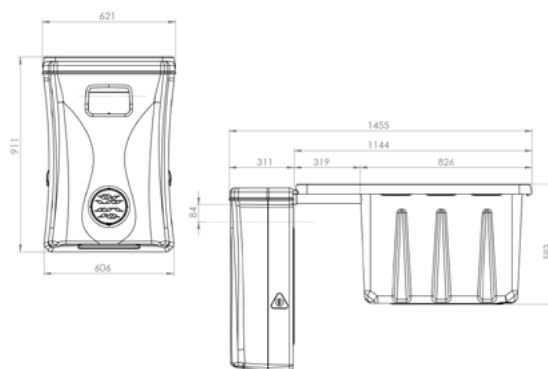

- Front skimmer-style water inlet,
- Front with extra-flat 25mm powerful LED and remote control,
- Adjustable-direction nozzles,
- High temperature pump suitable for filtration,
- 1 high temperature pump adapted, 100% assembled and checked aesthetic product fitting with the deck
- Remote monitoring (Filtréo)

Designed and manufactured in our factory

## DIMENSIONS

## OPTIONS p. 73

- Electrolysis with cell location ;
- New cartridge cf. page 64.

# FILTER WALL

## Filtration and lighting

**A SIMPLE, ECONOMICAL, LOGICAL ALL-IN-ONE UNIT THAT SITS AGAINST THE SIDE AND MAKES IT EASIER TO IMPLEMENT POOL ESSENTIALS.**

### FEATURES

- Complete assembled unit comprising a rear service unit and various elements that can be customised.

#### Front:

- A wall measuring: 900-750-250mm.
- And various elements:
  - 1 A400 DESIGN skimmer
  - 2 DESIGN range adjustable-direction nozzles
  - 1 extra flat monoblock projector, Easyled Evo, 6 white LEDs
  - 1 cover for the tank to be "protected".
  - 1 remote control for lighting.

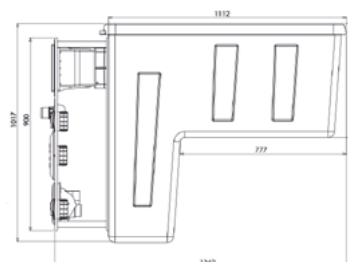

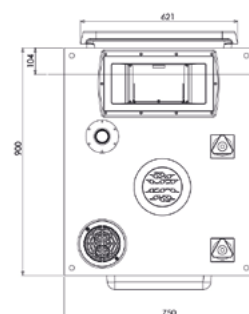

In plant room, which dimensions are 1120x1020x620 mm:

- 1 PHT pump with specially-designed resin-coated high temperature (65°C) motor for underground plant rooms.
- 1 electrical box with clock and transformer to power the projector and pump.
- 1 heat pump bypass or other integrated heating system.
- 1 integrated C5 cartridge (recommended filtration for 65 m³ pool).

**Options :** create flow in your pool with a counter current swimming (CCS) system created with our expertise: the Jet Vag. (cf. photo).

### DIMENSIONS

- Watertight and ventilated
- Range of customisations to choose from:
  - cover finish (timberteck or single cover) and internal options,
  - Skimmer, nozzles and lighting,
  - CCS,
  - Optimised integration...
- Remote monitoring (Filtréo) p.84.

### COMPOSITION

- A400 DESIGN SKIMMER
- 2 Design range nozzles
- Your choice of cover
- Easyled EVO projector
- C5 cartridge or new cartridge
- PHT 15 Vipool pump
- By pass Heat pump

CODE	FILTER WALL FOR 65M3 MAX POOL
MF96C5	Standard filter wall

# SKIMBLOC

## Burying Filtering box

**TURNKEY SOLUTION FOR ALL NEW PROJECTS OR RENOVATION.  
IDEAL IN COMBINATION WITH A SKIMFILTER PRODUCT.**

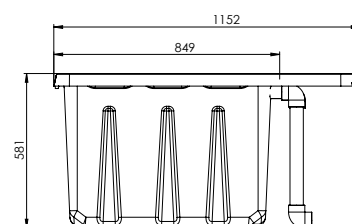

### FEATURES

- A complete filtration local to bury, with pre-filter in combination with a skimfilter.

It can be installed at the convenience to adapt to outside space and not just near the pool.

### DIMENSIONS

### COMPOSITION

- 2 suctions with 2 off 1/4 turn valves,
- 2 returns with 1 valve,
- 1 self priming pump with pre-filter,
- 1 departure by-pass,
- 1 electric box with powered remote control for projector 100
- VA max, special place for electrolysis cell (not provided)
- Simple cover (to be customized).

CODE	DESCRIPTION
localent 10	Burying filtering box for C2/C3
localent 15	Burying filtering box for C5/C6
localent 20	Burying filtering box for C6/C7
CFTC01	Timberteck grey slats finish for cover
localent001	Customised burying filtering box

# OPTIONS

## Saddle unit & filter wall

### CCS OPTION

#### FEATURES

Standard assembly includes :

- P1 pump : 2.2 Kw
- Separate suction and return ;
- Return with inbuilt direction-adjustable and air/water-adjustable nozzle ;
- Electric box ;
- On/off button and remote.

### OPTION ELECTROLYSIS

ready to install  
cell

#### FEATURES

- Salt level: 4.5g/l ;
- Automatic, adjustable polarity reversal ;
- Flow sensor ;
- Cell with inline titanium plates ;
- Production displayed with LEDs ;
- Easy adjustment of salt production.
- Shutter.

### COVERING GREY TIMBERTECK SLATS

#### FEATURES

#### GREY TIMBERTECK SLATS

A polymer protection ensures high resistance to scratches, spots and discoloration.

- + non-slip
- + anti dust and dirt.

### COVER

#### FEATURES

Simple cover to be customised.

CODE	OPTIONS FILTERING WALL OR SADDLE UNIT
CFCT	Grey timberdeck cover
CSH	Cover for filtering wall or saddle unit «to be covered»
200046	Option CCS for filtering wall or saddle unit
200047	Electrolysis for filtering wall or saddle unit

# EVERBAG

## An alternative to cartridges

**PREVENTS FILTER CLOGGING AND PROTECTS THE PUMP. EVERBAG FEATURES A RIGID ABS RING WITH A FASTENER AND A FILTER BAG MADE OF RIGID WOVEN FABRIC WITH 500-MICRON EFFICIENCY.**

This pre-filter captures all the large impurities (leaves, grass, bugs, etc.) suctioned by the skimmer to guarantee pump efficiency.

It can be easily cleaned by turning it inside out and brushing lightly.

They are interchangeable with WELTICO cartridges of equivalent size (C2 to C7).

For SKIMFILTER filters, we recommend replacing the cartridge and basket with a bag for cleaning at the start of the season or after a strong wind to easily collect all the large debris suspended in the water.

- Cartridge replacement.
- Ideal beginning of early season or back into service after wintering.

CODE	EVERBAG PRE-FILTER BAG
62842	EVERBAG JUMBOSKIM
62843	EVERBAG P3
62845	EVERBAG P5
62846	EVERBAG P6
62847	EVERBAG P7

# WELFILTER

## C2 to C7 range

**ECONOMICAL, COMPACT CARTRIDGE FILTERS FOR 25 TO 95M<sup>3</sup> POOLS, IDEAL FOR ABOVE-GROUND POOLS.**

- Complete range for swimming pools from 25 m<sup>3</sup> to 95 m<sup>3</sup> and a very fine filtration.
- Stick-on inlet/outlet diameter 50 mm.
- Delivered with 38 mm diameter stick-on ringed reducer.
- Compatible with the new range of anti-bacterial cartridges.

**NEW CARTRIDGE  
COMPATIBILITY**

- High degree of filtration (15 microns).
- High-capacity cartridge.
- Ecological: easy cleaning, saves water.
- Reliable, safe operation under vacuum.
- Connects before the pump «on suction».

97408	WELFILTER cartridge filter C6 (max. flow 19 m <sup>3</sup> /h)
97409	WELFILTER cartridge filter C7 (max. flow 22 m <sup>3</sup> /h)

# CLEANING TANKS

## Cleaning tanks C2 - C7

### FOR EASY CARTRIDGE CLEANING

Clean cartridges by soaking in a WELCLEAN cleaning solution without wasting any of the product.

Our tanks safely store the solution in between cleanings and are easy to empty using the lower button.

- Adapts to Weltico cartridges
- 3 sizes
- Made of ABS

# FILTRE'O

## Control and management of all pumps

### FEATURES

FILTRE'O proposes a complete solution for swimming pool filtration. It consists of an electrical unit to be installed in the plant room, box side and an application for remote access to the pump control, lighting and the choice of a heat pump or a salt water chlorinator.

It enables to:

- Remotely control the filtration pumps via a Smartphone,
- Obtain feedback in real-time,
- Manage lighting.

### OVERVIEW OF THE DIFFERENT FUNCTIONS

- ▶ Schedule operating time ranges
- ▶ Anti frost protection function (with air sensor option)
- ▶ Forced march function
- ▶ Pump electrical protection
- ▶ Filtration time sum counter
- ▶ Time filtration automatic control depending on water temperature
- ▶ Lighting control.

- Free application.
- Easy to set up.
- Suitable for all types of pumps (max. 7 A).
- Works in Bluetooth via our application available on Android and IOS.
- LCD Color Display.

# ADVANTAGES VIPOOL RANGE

- 1 Expertise built on our design and engineering department.
- 2 100 % of our components are checked before being used in production (quality of the raw materials, dimensions, appearance, etc.).
- 3 After production, all our pumps are tested in the open air (guarantees the seal) and immersed in water for at least 10 minutes to check their hydraulic and electrical performance.
- 4 As we attach particular importance to the quality of our products, all are EC and ROHS certified.
- 5 Patented System from ACIS: all of our swimming pool pumps are fitted with an exclusive FLEXIBLE POCKET FILTER® system, registered under French patent number 11 59373.

## PFS Principle of operation

## Benefits

At the heart of the pump, the Flexible Pocket Filter holds everything back!

With its very fine mesh, the Flexible Pocket Filter system captures even the smallest impurities (such as pine needles, sand, gravel and hair) that could otherwise damage the pump.

This patented system is an effective debris trap.

### Product codes for our Flexible Pocket Filters® alone :

Code	Code for FPF alone
601000S	MCB - MCB+
601002S	MNB - MNB+
601001S	MJB - MPB - MJB + - MKB+
601004S	Renovo® - Renovo Vs

## STAINLESS STEEL Earthing Plug

### Why using this system?

Pools are usually loaded with residual electrical current. This phenomenon is amplified when a salt water chlorinator is used.

- If the pool is not earthed, the difference in potential between the pool and surrounding earth may cause damage (faster wear of bearings and pump mechanism lining due to the passing current).
- With a stainless steel plug, this current is evacuated towards the motor casing without touching the rotor shaft or bearings.

The standard versions of our pumps run at 50Hz. The majority of our pumps are available in 60Hz format, subject to a 10% surcharge on the advertised price. Please consult us for more details.

# RENOVO® PUMP

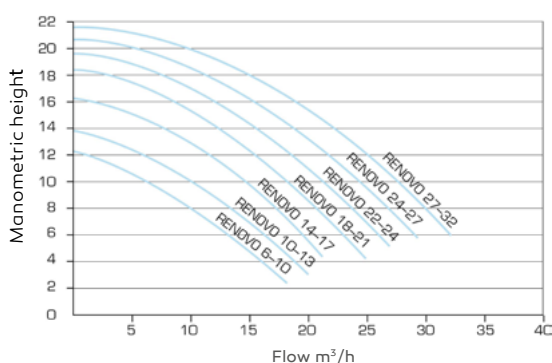

Self-priming pump for pools  
Compatible pump

## FEATURES

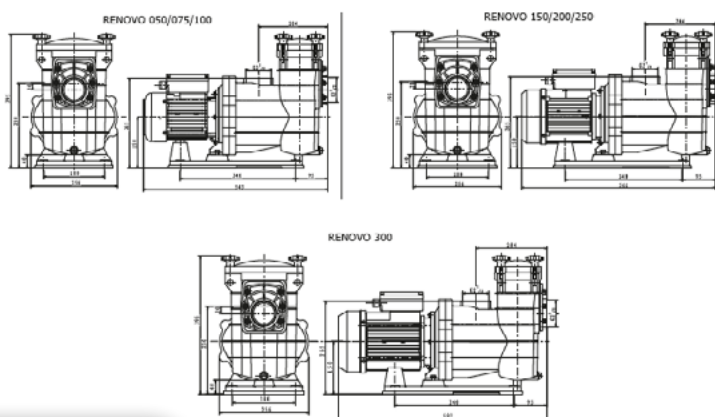

- Replacement pump for most systems on the market (PENTAIR®, HAYWARD®, ESPA®, ASTRAL®, SPECK®, KRIPSOL®, DAB®, STARITE®, KSB® and MARLOW®).
- Fits most installed systems.
- Good hydraulic output and energy efficiency. Uses the existing cable.
- Available: A universal pump for instant on-site replacements without needing to order the product and return later.
- High capacity of the prefilter : 1 145 cm<sup>2</sup>.

## PERFORMANCES

## DIMENSIONS

- Ultra-silent.
- Special high ambient temperature resistant motor = 65°C.
- H-class high temperature dual seal bearing 2RS C3.
- ACIS know how is concentrated in this product
- 100% 304 stainless steel screws.
- Stainless steel earthing plug.
- Stainless steel 316 friction/fusion shaft fully covered by the impeller tail portion so no contact with pumped liquids.
- Can be used with sea water and salt chlorinators.
- Remote controllable

# RENOVO® PUMP

## Simple to use

- You keep the existing unions on your current system, as well as the existing cable.
- After removing the existing pump, simply install RENOVO® using its adapter kit and connect it to the power.
- Our ingenious system means that, within the same system (with various hydraulic power levels), you can adapt it using the existing unions for most previously-installed pumps on the market.
- In your kit, you will find all the unions you need to fit most systems

### KIT COMPONENTS

- 1 Pump ;
- 2 2 suction-side attachment plates (one assembled on the pump) ;
- 3 Base (removable if needed) ;
- 4 Unions to fit most existing models (see table opposite) ;
- 5 Full installation manual.

# PHT PUMP

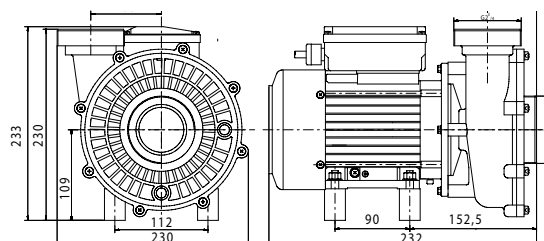

Compatible with Desjoyaux® block\*

## FEATURES

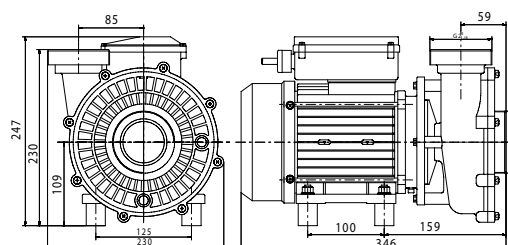

- Special high ambient temperature resistant motor = 65°C. Designed and built to withstand heat, particularly in the case of underground plant rooms or filtration blocks (little or badly ventilated), or those exposed to the sun or subject to the heat of summer.
- Available in two speed (low or high speed).
- Option : Remote control in bluetooth with Asys. Filtreo.
- 4-Colour printed packaging for better visibility.
- Optimised pump protection by adding expanded foam inside the box.

\*Important: The DESJOYAUX® brand belongs to third party. It is only used to inform trade customers about the PHT pump's compatibility with this brand and its Desjoyaux® Block product. The use of the brand is not intended to suggest that the products described would be identical to the products and facilities marketed under the brand mentioned, or that there is a link between ACIS, the manufacturer of the PHT pump, and the owner of this brand. As a pumps manufacturer, ACIS guarantees that a replacement in accordance with the supplied mounting rules, does not affect previous performance.

# MCB+PUMP

## Self priming and compact

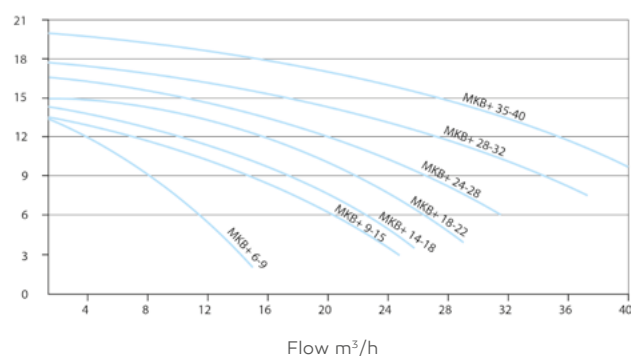

### FEATURES

- Suction and return in line with the impeller in the diffuser.
- Stainless steel earthing plug.
- Acceptable circulating liquid temperature in VIPOOL filtration pumps: + 5°C to 50°C.
- Prefilter capacity : 375 cm<sup>2</sup>
- Option : Remote control in bluetooth with Asys. Filtreo.
- 4-Colour printed packaging for better visibility.
- Optimised pump protection by adding expanded foam inside the box.

# MNB+ PUMP

Self priming and compact

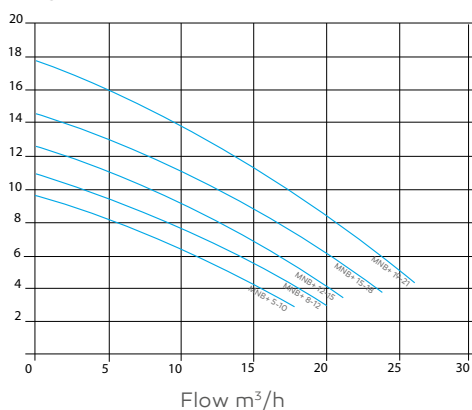

## FEATURES

- Stainless steel earthing plug as standard.
- Clear cover for checking the pre-filter (490 cm²)
- Option : Remote control in bluetooth with Asys. Filtreo.
- Acceptable circulating liquid temperature in VIPOOL filtration pumps: + 5°C to 50°C.
- Replaces HPS Hydrosim.
- Ambient temperature up to 40°C.
- 4-Colour printed packaging for better visibility.
- Optimised pump protection by adding expanded foam inside the box.

# MJB PUMP

## Self-priming pump

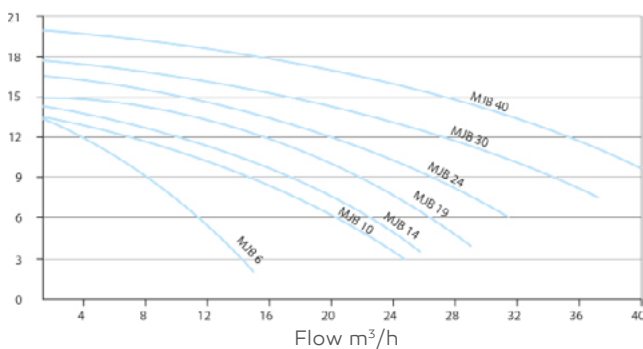

### FEATURES

- Transparent lid.
- High capacity prefilter.
- Option : Remote control in bluetooth with Asys. Filtreo.
- Comes as a replacement of an HGS or HGV (Hydrosxim).
- Admissible water temperature circulating in VIPOOL pumps filtration : from +5°C to 50°C.
- Supplied with unions.

# MPB PUMP

## Rotating pre-filter on-demand

### FEATURES

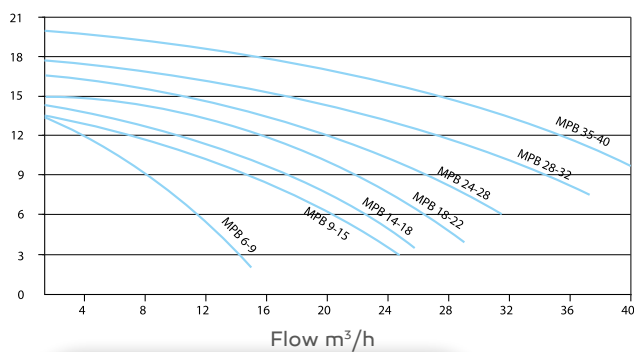

- Pump available on request.
- 228° rotating pre-filter (patented system).
- Adjustable to the nearest degree to fit the angle of the suction hose.
- Ultra-silent pump.
- Clear cover.
- Option : Remote control in bluetooth with Asys. Filtreo.
- Acceptable circulating liquid temperature in VIPOOL filtration pumps:  
+ 5°C to 50°C.
- Ambient temperature up to 40°C.

# HIGH TEMPERATURE RANGE T°MAX

## FEATURES

- Based on our success with the specific pumps for PHT underground blocks and our RENOVO® compatible pump, in line with current climatic constraints, Vipool is expanding its range with 2 best sellers integrating this technology.

Products from ACIS know-how:

- Proven materials: bolts, stainless steel purge plug, PFS, resin motor, guaranteed bearings...
- Specific motor with optimal heat dissipation + resin, certified for ambient temperatures up to 65°C.
- Design for poorly ventilated or sun-exposed areas
- Self-priming pump.

RANGE	<b>T°MAX</b> 65°	ADVANTAGES +
<b>Renovo</b> 0.5 to 3 HP		<ul style="list-style-type: none"> <li>• Replacement pump for more than 40 models</li> <li>• Large capacity prefilter basket : 1145 cm<sup>2</sup></li> </ul>
<b>PHT</b> 10-15-20 & dual speed		<ul style="list-style-type: none"> <li>• Desjoyaux block replacement*</li> <li>• Designed for underground blocks or rooms, poorly ventilated.</li> </ul>

Flow (m³/h)

# VARIPOOL

Variable speed, suitable flow

Up to 60%  
of energy savings  
Noise reduction

## CONTROLLER FOR NEW PUMP OR PUMP ALREADY INSTALLED

### FEATURES

ACIS will launch this year an independent speed controller that can adapt to all «traditional» pumps by transforming them into energy-efficient pumps with variable speeds.

Thus, any new or existing standard single-phase or three-phases filtration pump, becomes a true variable flow pump with 3 programmable speeds.

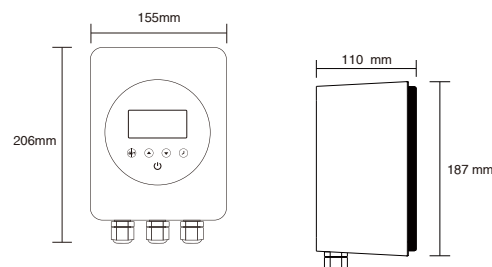

This speed controller modifies the rotational speed of the motor in order to select the flow most adapted to the filtration requirement. For example: adopting a sustained flow rate in case of high heat or increased use of the pool, or a slow speed to ensure high quality filtration and reduce power consumption.

- Daily programmable timer, that can be divided into 4 sectors.
- Enables to stop and start at the 3 selected speeds (1200 to 2900 rpm).
- Also operates in manual mode.

► Easy to use with  
touch-screen monitor

### DIMENSIONS

- 4 models available
- Adapt the flow to needs or use
- 3 programs to choose from
- Allows 60% energy savings
- Easy to install
- Prolongs pump long life
- Gives new life to any pump

### OPTION

- External control cable for 3 speeds and stop.  
ref : 50967

CODE	Varipool Variator
50963	Variator VARIPOOL for single phase pump - Max power 1,1 Kw
50964	Variator VARIPOOL for single phase pump - Max power 2,2 Kw
50965	Variator VARIPOOL for three phases pump - Max power 1,1 Kw
50966	Variator VARIPOOL for three phases pump - Max power 2,2 Kw

# PUMPS

## EKO

### A VARIABLE SPEED PUMP ACTS ON DIFFERENT LEVELS

- **Electricity consumption:** tailoring the filtration power to the system's needs results in significant power savings.  
Decreasing it by just a few m<sup>3</sup>/h will generally result in 33% power savings.
- **Consumption adapts** to uses and needs in real time.
- **Noise reduction:** our pumps offer incomparable acoustic comfort.
- **Better filtration:** water moves more slowly through the filtration system and particles are trapped more effectively.
- **Filtering for longer:** low energy consumption means the filter can run 24/7 for more consistent water treatment and heating.
- **Service life of the pump:** less heating means an optimised service life for the pump and its components.

# RENOVO® VS PUMP

## EASY TO IMPLEMENT AND USE

- Replacement pump for most systems on the market (PENTAIR®, HAYWARD®, ESPA®, ASTRAL®, SPECK®, KRIPSOL®, DAB®, STARITE®, KSB® and MARLOW®).
- Fits most installed systems.
- Good hydraulic output and energy efficiency. Uses the existing cable.
- Available: A universal pump for instant on-site replacements without needing to order the product and return later.
- High capacity of the prefilter : 1 145 cm<sup>2</sup>.

- ▶ You keep the existing fittings or nuts on the existing installation, as well as the electrical cable.
- ▶ After removing the pump, install RENOVO® using its adapter kit and connect it electrically.
- ▶ Our ingenious system allows with a single body (in different hydraulic powers) to be adapted with existing connections on the main pumps on the market already in place.
- ▶ In your kit you will find all the necessary connections to adapt to most situations.

## KIT COMPOSITION

- 1 Pump with prefilter and FPF ;
- 2 2 suction-side attachment plates (one assembled on the pump) ;
- 3 Base (removable if needed) ;
- 4 Unions to fit most existing models (see table opposite)
- 5 Full installation manual.

*\*These pumps can be replaced with RENOVO® by cutting and bonding (in line) to existing pipes.*

Important: The brands and names of cited products that bear the trademark symbol ® belong to third parties. They are only used to inform trade customers on the compatibility of the RENOVO® pump with these brands and products. The use of the trademarks and references of products listed is not intended to suggest that the products described would be identical to the products and facilities marketed under the brands mentioned, or that there is a link between ACIS, the manufacturer of the pump RENOVO®, and the owners of these trademarks. As a manufacturer of the compatible RENOVO® pump, ACIS guarantees that a replacement in accordance with the supplied mounting rules, does not affect previous performance.

# RENOVO® VS PUMP

## Compatible variable speed

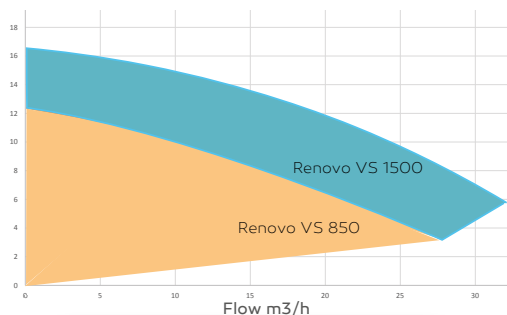

### FEATURES

- A versatile and more over economical, what else could we ask for? Renovo VS allows replacement of a classic pump by variable speed technology.
- Variable speed technology (see intro) is the best we can offer in terms of filtration: economical, silent, resistant.
- For example, you replace your old pump, by more efficient technology, more suitable to your needs.
- Control and setting on keypad with 5 buttons on the pump  
4 buttons for speed set up (pre registered speed and adjustable)  
1 on/off button.

### PERFORMANCES

M. Height.

- Tactile terminal block equipped with keypad and screen: control and settings on the pump.

### OPTIONS

- Separate control and setting unit ref BD 156, 260 €.
- Filtreo\*.
- Low water warning (function on frost protection box)\*.

\*Prices on request.

# MKB 2S PUMP

Good compromise

## FEATURES

Pump with 2 fixed speeds and a control unit included.

- Consumes 350 W at low speed.
- Silent.
- Clear cover.
- Optimised and adaptable operation with two timer-controlled speeds:
  - Low speed with filtration at 7-10 m<sup>3</sup>/h: energy saving mode for daily use. The pump filters economically and ecologically.
  - High speed and fast filtration at 8-15 m<sup>3</sup>/h: mode recommended for cleaning the filter, during heat waves or during periods of more frequent use.
- Recommended operation: 1hr/day for skimming, for example.

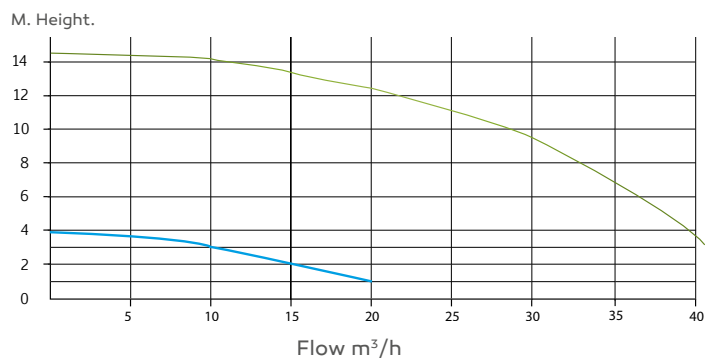

## OPTION

Separate control unit frost protection and low water unit

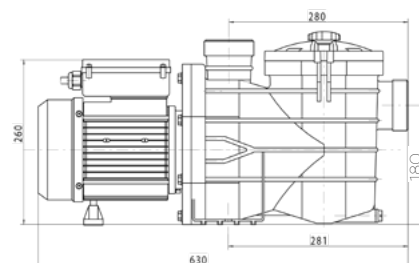

## PERFORMANCES

- Easier pump control and adjustment:
- Control panel (on/off and wash) with time and mode display.
- Clock for programming the 2 speeds.
- Thermal and motor protection.
- Compatible with chlorine and salt.
- 2 options for connecting to the control unit.

# MKB REVOLUTION PUMP

## Constant flow system

### FEATURES

This pump's features are identical to the MKB VS with all the benefits of the E.C. engine.

Equipped with an independent sensor and a box to maintain a constant flow by changing the speed of the motor according to the pressure losses of the installation. It is ideal for overflowing pools.

Pump composition:

- Wall box with 4 display buttons.
- Sensor with collar support

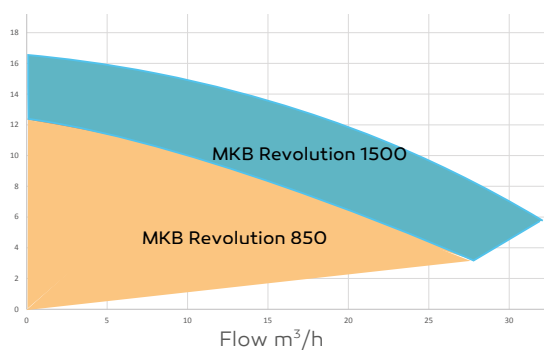

ASYS•REVO

### PERFORMANCES

# CCS PUMP WITH PREFILTER

Monoblock-type CCS filtration  
for pools and industry

## FEATURES

- Self-priming.
- Clear cover for checking the pre-filter.
- Robustness of materials:

Pump body and impeller: Noryl GFN3.

Unions: NBR.

Shaft: stainless steel 316 series.

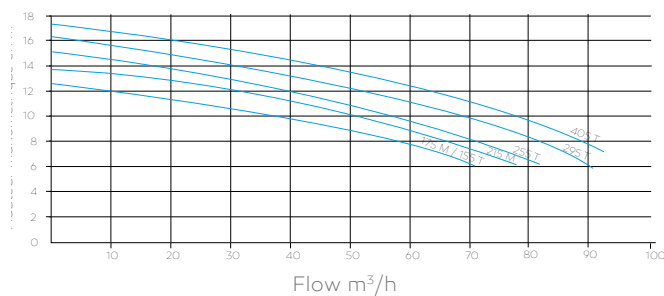

Mechanical seal : NBR/ceramic carbon

ABS pre-filter.

- ABS pre-filter.
- Delivered with 4" union.
- Opening key.

# HEATED SPA BLOWER

Relaxing bubbles!

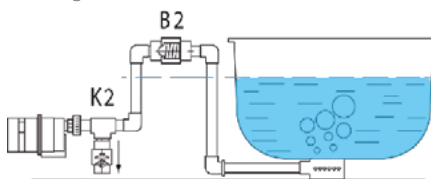

## FEATURES

- 2 heated models for spas and balneotherapy pools.
- Can be installed vertically or horizontally.
- Supplied with 1.5m cable.
- Ø 32 mm union.
- Thermal motor protection Class F.
- Important: When installing the blower under the water level (in charge), it is essential to install the back flow stop valve kit (see diagrams A & B\*) in order to avoid any risk of back water in the appliance.

# NORYSTAR PUMP

Self-priming pump suitable for robotic cleaners

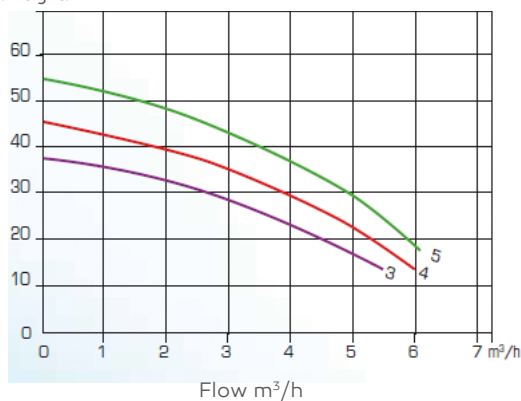

## FEATURES

- Self priming to 7.50m.
- Silent.
- IP55 motor - Class F.
- S1 rated for continuous use.
- 3, 4 and 5 impellers.
- Bolts and screws 100% stainless steel 304.
- Shaft in friction/melting stainless steel 316.
- 2.5 m cable without plug.

# 6-CLONE

ACIS, a French manufacturer, has nearly 20 years' experience in the filtration industry

- with cartridges,
- hydraulic pumps for swimming pools with the brand Vipool® and also filters.

For the 2020 season, Acis has developed the 6-Clone filter.

Resulting from Acis development, this filter meets the requirements of the market by offering:

- a filtration with a high fineness of 15 microns.
- a product in line with the times : compact, personalised, ecological.
- the advantageous replacement of a sand filter by a cartridge filter.

## WATER SAVINGS

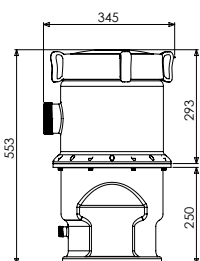

classic back wash  
of filter  
300L to 500L

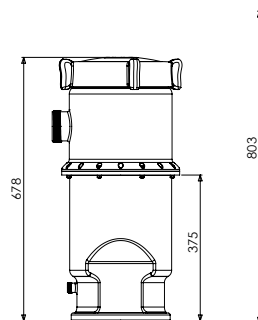

6-Clone  
5 to 10L

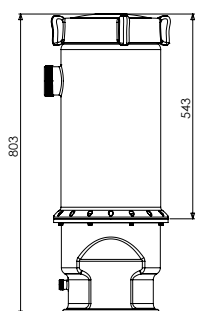

## DIMENSIONS

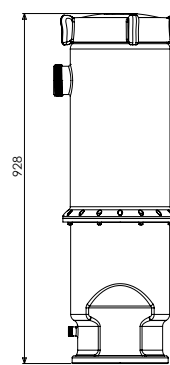

Cartridge filter 6-Clone - C3

Cartridge filter 6-Clone - C5  
15 m<sup>3</sup>/h

Cartridge filter 6-Clone - C7  
22 m<sup>3</sup>/h

# 6-CLONE

## Pressure Cartridge Filter

**FUTURE OF FILTRATION : QUALITY, FINENESS AND ECOLOGY FOR BOTH NEW INSTALLATION OR RENOVATION.**

### FEATURES

6-Clone is a new filter for swimming pools from 25 to 95 m<sup>3</sup>.

Thanks to its ingenious adjustable system, 6-Clone can easily be adapted to all configurations of a technical shed. It is not very cumbersome.

- Uses Weltico cartridges (same dimensions)-15 microns. see p. 63
- 4 cartridge sizes: C3-C5-C6-C7

### ADVANTAGES

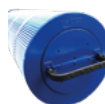

- Easy maintenance: transparent tank for a visual check of the clogging of the filter.
- Economy of water compared to a traditional filter: no back washing.
- Cartridges made in France with proven qualities.
- Compatible with antibacterial cartridge.
- Compact and clever.
- Simplifies handling :
  - No need 6-way valve, no sand,
  - Water doesn't go to sewer system,
  - Manometer included.

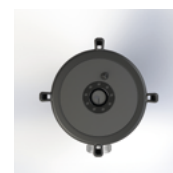

### COMPOSITION

- Transparent tank + cover
- Manometer
- Unions and fittings include ø 50 or 63 mm to glue
- Cartridge (15 microns).

2 kinds of compatible cartridges

Manometer

# FULL IN PALL

All in Pall evolution with pressure cartridge filter

## FEATURES

- Range of 3 products to choose from 10 to 20 m<sup>3</sup> max.
- The assembly is mounted and air tested, assembled with removable unions and 1/4T shut-off valve.
- PAC by-pass as standard.
- Easy commissioning and maintenance.

**6-Clone**

## KIT COMPONENTS

**A-1** stand, floor dimensions: 1 m (L) x 0,45 m (l) x 1,25 m (H) ;

Color: dark brown material: 12 mm plywood with Sveza birch outer for greater sturdiness ;

**B-1** Vipool filtration pump, MKB+ (3 models: 10, 15 and 20 m<sup>3</sup>) ;

**C-1** electric box for filter with clock + 100 W transformer for lighting ;

**D-1** x 3-valve PAC by-pass ;

**E-3** independent suctions with individual ¼ T stop valves ;

**F-1** filtering cartridge ;

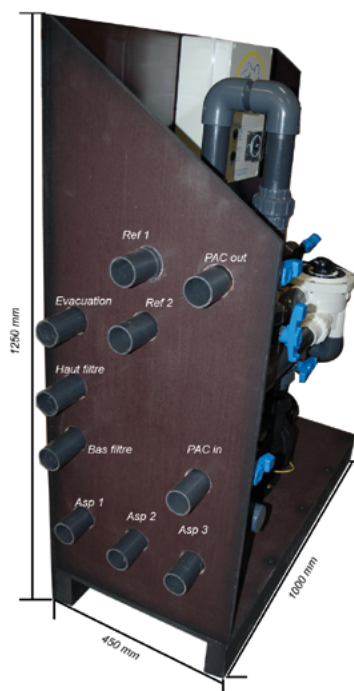

**G-2** independent return outlets with individual ¼ T stop valves ;

**H-1** inlet and 1 outlet for filter connection ;

**I-** 6-Clone pressure cartridge filter.

- An ultra-compact product
- The essentials at hand and under control.
- Advantages: light weight, easy door passage, easy installation.
- Cartridge filtration: water-saving, fine filtration, no drainage...

OPTION

# ALL IN PALL

Ready-to-use filtration system  
with filter (separate)

## FEATURES

- Patented product (no. 175-s902)
- Everything you need to control within reach.
- Benefits: lightweight, passes easily through doorways, choice of where to put the filter (separate system), easy to install.
- Range from 10 to 20 m<sup>3</sup> max.
- System assembled and air-tested, assembly with 1/4T stop valve and unions that can be disassembled.
- By-pass for heat pump included.

## KIT COMPONENTS

**A-** 1 stand, floor dimensions: 1 L x 0.45 W x 1.25 m H - Color: dark brown  
Material: 12 mm plywood with Sveza birch outer for greater sturdiness ;

**B-** 1 Vipool filtration pump, MKB+ (3 models: 10, 15 and 20 m<sup>3</sup>) ;

**C-** 1 electric box for filter with clock + 100W transformer for lighting ;

**D-** 1 x 6-way valve for flow changes ;

**E-** 1 x 3-valve PAC by-pass ;

**F-** 3 independent suctions with individual ¼ T stop valves ;

**G-** 1 drain with 1/4T stop valve ;

**H-** 2 independent return outlets with individual ¼ T stop valves ;

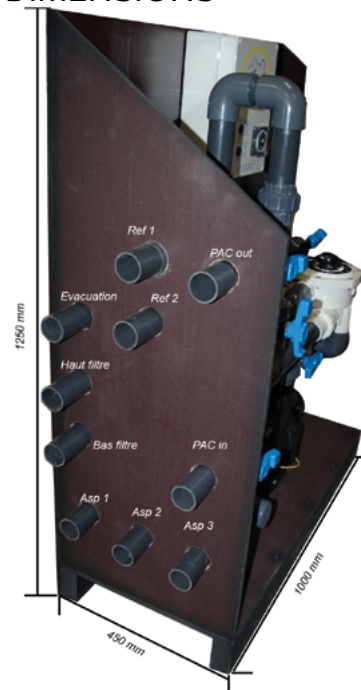

**I-** 1 inlet and 1 outlet for filter connection ;

**J-** Blow-moulded side filter (3 models : 10, 15 and 20m<sup>3</sup>).

- Options available: pH regulator and salt water chlorinator.
- Filter space to be chosen.

# BOBBIN WOUND FILTER

Highly resistant filter !

## FEATURES

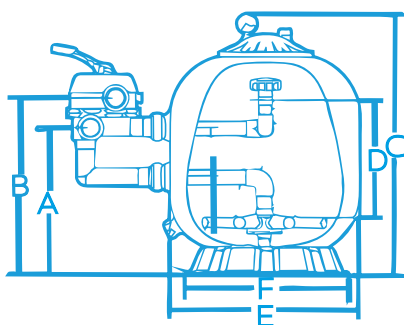

- Highly resistant filters, in fiberglass.
- Diffuser over the top of the filter.
- 1.5" or 2" 6-way valve (depending on filter Ø).
- Pressure gauge (bar).
- UV-resistant.
- Clear cover for filters: 11 and 15 m<sup>3</sup>.
- Supplied with unions.

## SPECIFICATIONS :

- Max service pressure: 2.5 bars.
- Test pressure: 4 bars.
- Max. T° C : 43° C.
- Max filtration speed: 50 m<sup>3</sup>/h/m<sup>2</sup>.

# A solution for *jet vag* every swimming pool

There is a Jet Vag solution for every pool type.

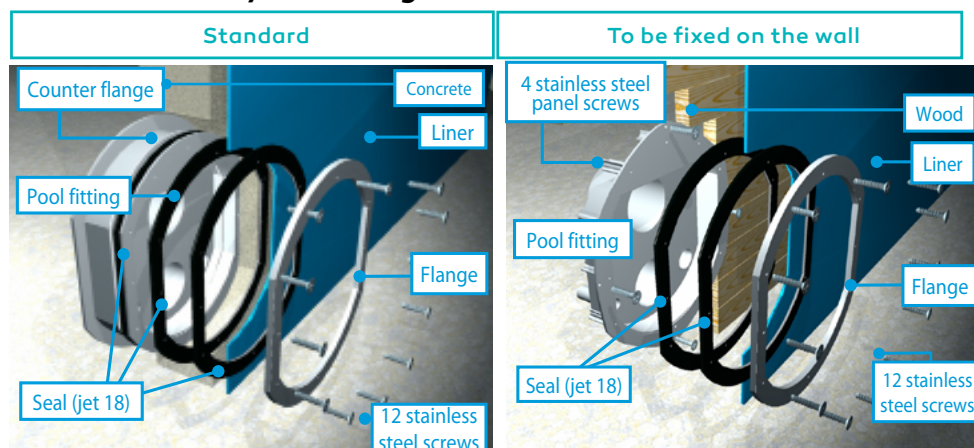

The range can fit all new-build and renovation projects.

Jet Vag products are really simple to use. Jet Vag can be used with all pools structures on the market thanks to a choice of 2 pool fittings:

- Standard with back counter flange
- To attach to a side

Pool side	Standard fitting (Ø 63/75 mm)	Side-attachment fitting (Ø 63/75 mm)
Concrete	●	●
Shell	●	-
Wood	-	●
Galva	-	●
Panels	-	●
Aluminium structure	-	●
Stainless steel structure	-	●

## How to choose your fitting ?

## Order in 2 steps\*

### JET VAG goes at your pace

**Step 1**, package 1: choose your pool fittings.

**Step 2**, package 2: choose your Jet Vag add-ons (New, Lum, Pro Luxe, Duo Mix or Alvéo'Nox).

**Advantages:** Once you have chosen your fittings, you can take your time choosing the add-ons!

With 2 and 3 hp Mono or 3-5.5 hp Tri, white or color front panels, and New, Lum or Pro Luxe models, you are spoilt for choice!

\*2-step ordering not available for Junior Pro, BS and JN kits.

## or full order

## 1 package

Just one box, one reference including sealing part and complement.

**Advantages :** You have all the components you need in one single package so you are ready to install your Jet Vag from A to Z!

## Jet Vag's counter-current swimming system adapts to your needs and desires

With classic white or color front panels, the Jet Vag range spoils you for choice. It is available in shades of light to dark grey, sand and chrome-plated (Pro Luxe and Duo Mix only).

### JET VAG FRONT PANELS:

- Monoblock front panel (integrated suction and return) with central nozzle and push button.
- Adjustable nozzles: delivering performance and comfort.
- Patented system/registered design => Nozzle for adjusting water flow (3 positions) and supplying air.
- Controlled flow with choice of 2 nozzles:
  - Ø 35mm on JS, BS and Junior Pro kits.
  - Ø 42mm on New, Lum, Pro Luxe ranges.

### JET VAG PLUS POINTS :

- On/off remote control for the pump with appropriate electrical box.
- Special connection box\*\*, as standard in our pool fittings, for easier connection.
- High performance mono- or tri-phase CCS or Balneo pump, with resin-coated motor with 5 year warranty\*.
- Fun accessories: Jet vag can be combined with our massage hoses and our water jets.
- New piezo control.
- Our pool fittings also come in Ø 90mm. This means you can optimise your pool configuration to suit your technical constraints (for example, the Ø 90mm option minimises pressure loss when your plant room is over 10m from your pool).

\* except bearings and capacitor.

\*\* Pool fittings are provided with 2 translucent hoses of 1.5m that you must bring up above water level

These 2 hoses must be linked to the special connection box sealed on the pool edge.

# LOW LEVEL SUCTION

## New sealing part

### FEATURES

Jet Vag launches ultra flat sealing part, without over thickness even with a liner.

Replaces usual main drain.

In addition, the low suction allows the adaptation on the wall and the compatibility on all types of structures (panel...).

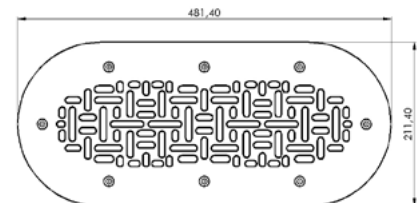

COLORS  
CHOICE

- Available as an option on our Bulleo SOLO or DUO kits instead of our classic suction.
- Available in ABS with color choice or stainless steel...

# ALVEO'NOX

## Design & performances

### A UNIQUE PRODUCT INSPIRED BY MODERN SHAPES

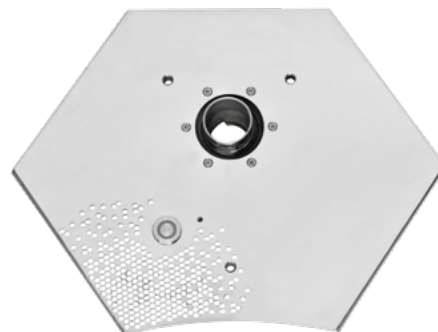

The ACIS team worked on this project with a Designer, using inspirational boards to draw the outlines of a different product. We wanted a product technical, design and elegant.

On the material side, stainless steel was chosen for its incomparable brilliance.

The light points brought by the perforation contribute to give it this neat finish.

On the design side, the straight shapes compensated by the curvature invite to a moment of relaxation.

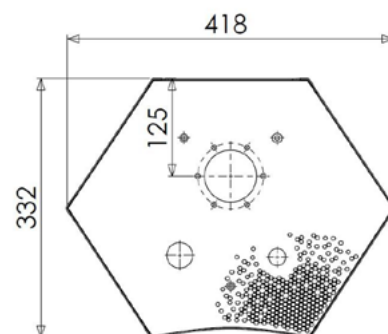

The honeycomb is intended to be a cocoon and reassuring.

### FEATURES

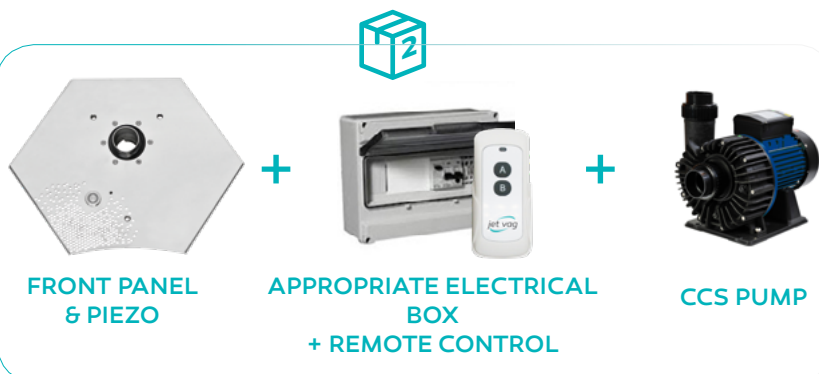

- A DESIGN and contemporary product.
- All stainless steel 316L composition: front and nozzle.
- Piezo light control, indicating operation.
- Also available as a single replacement facade.

### DIMENSIONS

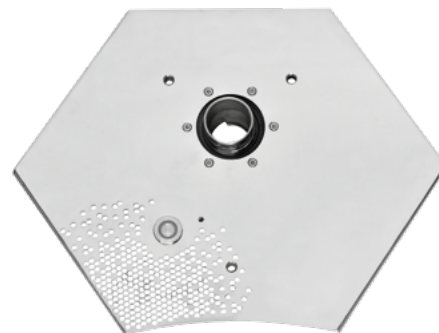

- Electric box
- Illuminated piezo control (as standard).
- Adapts to all Jet Vag pool fittings.
- Direction-adjustable stainless steel nozzles Ø 42 mm.

# EFFERVESCENCE® SOLO

## Bubble plate easy to install

### FEATURES

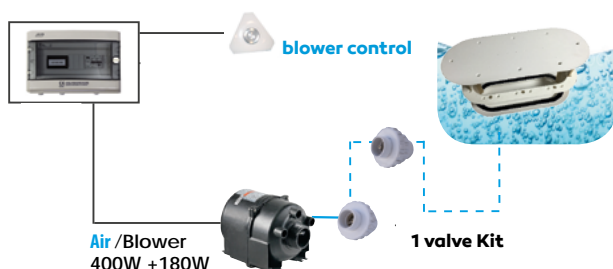

This elongated product in the shape of a very flat stone can be used in all types of spaces: steps, spa area, etc. Effervescence® releases bubbles to encourage relaxation and well-being. It is installed horizontally for optimal diffusion of bubbles.

It can be integrated in any space and will always match the bottom of the pool as it comes in a choice of 4 colors + stainless steel.

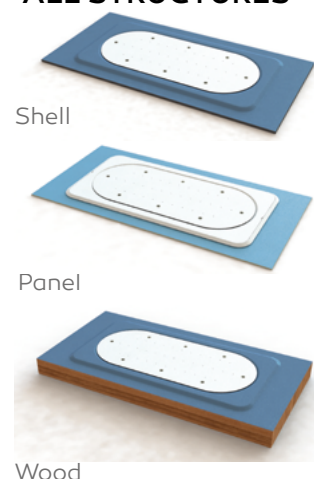

- Dimensions: length: 49 cm and width: 22 cm.
- Large bubble diffusion surface area with guaranteed effectiveness thanks to its one-piece structure.
- Perfectly flat - no raised surface, even on a liner.
- Easily adjusted height for sealing using two Ø 50-mm blind holes (rigid PVC).

## WATER GAMES

Enhance your beaches or your pool surroundings! Create a play area!

It's possible with our range of ACIS water games fully customizable by a large color choice.

### ADVANTAGES :

- Bright colors.
- High quality components: PVC painted tube, stainless fasteners, for a high resistance.
- Games 100% created by us, and tested in our factory.

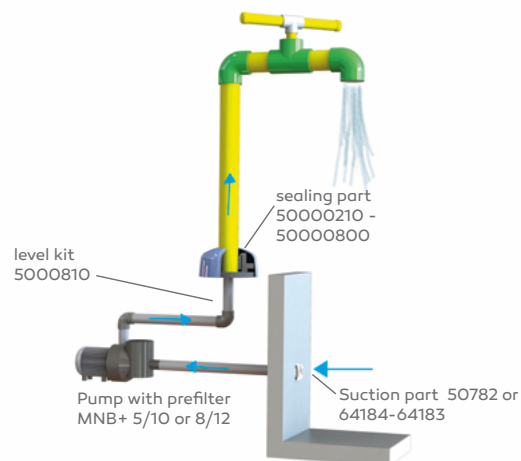

The range includes 14 customizable games, color choices.

## Principle of operation

The games run in closed-circuit at the pool level.  
Provided sealing parts ensure easy and quality game mounting.  
It also ensures their interchangeability.

### 1 : sealing part choice

Upstream, you have the choice between 2 sealing parts to fix games on it.

#### **Ref. 50000210 – sealing part for concrete to be fixed on the surface.**

Includes: 1 flange, 4 anchor studs bolts

## Article 1 - Purpose and scope

These terms and conditions of sale (T&Cs) apply between the company ACIS and the client, when carrying out its business activity. These T&Cs set out the entirety of the obligations of the parties. Any order for products implies the full and unreserved acceptance of these T&Cs by the client, which shall prevail over any contradictory document, and in particular, the terms and conditions of purchase of the client, notwithstanding any specific terms and conditions agreed in writing between our company and the client. Any document other than these T&Cs including catalogues, prospectuses, advertising and instructions are for information purposes only and are non-contractual.

## Article 2 - Orders

The order relates to any order for our products, which is accepted by our company, accompanied by the payment of the deposit that may be displayed on the purchase order. Orders transmitted to our company may not be rescinded once the order has been confirmed by ACIS, unless we agree otherwise in writing. Any request to modify the contents or volume of an order placed by a client can only be taken into account by our company if the request is sent in writing, including via fax or email and provided that the request reaches our company no later than two (2) business days after receipt of the initial order and gives rise to a new order confirmation from ACIS with any adjustments to the price. In the event that the client modifies the initial order, our company shall not be bound by the delivery deadlines agreed for the initial order. ACIS reserves the right to suspend the fulfilment of any client orders if our trade terms are not respected. The goods ordered may not be the object of a trade-in deal.

In the event that a client places an order with our company, without having paid for previous order(s), our company may refuse to honour the order and deliver the goods concerned, without giving rise to any compensation for the client, for any reason whatsoever.

## Article 3 - Price

**3.1. Calculation/adjustment:** The prices of our products are stated for information purposes in the catalogues of the company for the calendar year in progress at the time of order. These prices may, however, be revised without notice, according to variations in the elements that make up the cost price of the products. Any price changes shall apply to orders placed after the change takes effect. The client shall be informed of this price change when placing the order. Our prices are exclusive of tax and shipping.

**3.2. Minimum amount:** We only accept orders (or bundled requests) for amounts equal to or greater than twenty-five euros (€25.00) exclusive of tax. If applicable, a sufficient number of parts shall be delivered to bring the total amount as close as possible to this minimum charge. This minimum does not apply to order balances. Our prices do not include the eco-contribution. All orders amounting to less than one hundred and fifty euros (€150.00) excl. tax shall be processed and managed subject to an additional fee of twenty euros (€20.00) excl. tax.

Furthermore, all orders registered for direct delivery (at the premises of a client of a client) with a specific delivery note shall be processed

and managed subject to an additional fee of thirty-five euros (€35.00 excl. tax).

## Article 4 - Payment terms

**4.1.** Our invoices must be paid within 30 calendar days from the date of delivery. The payment due date can be found on the invoice. The prices are net without discount.

**4.2.** All orders that we agree to fulfil shall be fulfilled, subject to the client providing sufficient financial guarantees and paying the amounts owed by the due date, in accordance with the legislation that applies to these T&Cs. Also, if our company has serious or particular reasons to suspect any difficulties with the client's ability to pay on the date the order is placed, or after this date, or if the client no longer provides the same guarantees as it did when the order was placed, our company may make acceptance or fulfilment of the order subject to a cash payment or provision by the client of sufficient guarantees with regard to our company. Should the client refuse to make a cash payment without providing sufficient guarantees, our company may refuse to honour the order(s) placed and deliver the goods concerned, without the client being able to state the case for an unjustified refusal of sale, or claim any compensation.

**4.3. Failure to pay/late payment:** In the event of a late payment or failure to pay for all or part of the goods delivered, by the payment due date indicated on the invoice, the client must pay a penalty fee to our company equal to three (3) times the legal rate of interest calculated using the price, inclusive of tax, stated on the invoice. The legal rate of interest shall be that which is in force on the date the goods are delivered. This penalty fee shall run from the payment due date indicated on the invoice, without any formalities or formal notice being required.

Unless there is express prior written agreement from ACIS, and provided that the mutual claims and debts are certain, liquid and payable, no offset can be validly applied for any penalties for delays in the event of non-conformities of the products ordered by the client on the one hand, and the amounts owed by the latter to ACIS, for the purchase of said products, on the other hand.

In addition to late payment fees, any amount, including the deposit, that has not been paid by its due date shall lawfully give rise to the payment of a fixed penalty of 40 euros for recovery costs. These penalty fees shall not prevent the company from exercising its right to take legal action before the competent court, in order to end this non-payment, with penalty fees being applied for each day of delay.

## Article 5 - Delivery and shipping

Delivery shall be made to the premises indicated on the purchase order by the client, with the products being given directly to the client. The client may change the location of the delivery, subject to providing notice of 4 business days prior to the scheduled delivery date, at the expense of the client. Similarly, in the event of particular requests from the client concerning packaging or shipping conditions for the products ordered, duly accepted in writing by ACIS, the related costs shall be subject to additional specific invoicing.

**5.1. Lead times:** Delivery lead times are provided for information purposes only; these depend,

in particular, on the order in which the orders arrive and the availability of the carriers. Delivery lead times are, in principle, 12 business days for products in stock from the date on which ACIS confirms the order and the price is paid, and 10 weeks for products available to order or custom products. Our company strives to respect the delivery lead times that it indicated when the order was accepted, depending on the professional logistical reference period, except in cases of force majeure (as defined in Article 12 below).

**5.2. Late delivery:** Any delay to the initially stated lead times for provision shall not justify the termination of an order placed by the client and recorded by our company, nor shall it be used to justify the cancellation of an order, nor incur the liability of ACIS for any reason whatsoever (as well as in the event of force majeure - as defined in Article 12 below), nor give rise to any penalties or compensation from us. The penalty clauses that can be found in the sales documents such as the terms and conditions of purchase of the client shall not apply to us.

**5.3. Shipping:** It is the responsibility of the client, in the event of damage to the goods delivered or missing products, to state all relevant reservations to the carrier, by registered letter with confirmation of receipt, within three (3) calendar days from reception of the goods, excluding public holidays. A copy must also be sent at the same time to our company. If the client does not follow this procedure, the goods shall be deemed to be accepted by the client and no claim will be considered by ACIS. It is the responsibility of the client to provide any supporting evidence as to the true nature of the noted defects or missing products.

Our company cannot be held liable for any events that occur during shipping such as destruction, loss or theft, even if ACIS chose the carrier.

**5.4. Acceptance:** Acceptance without reservation by the client, of the products ordered, within a period of three (3) calendar days, covers all visible defects and/or missing product (after the above deadline, the client may not start any action for a non-conformity nor bring this action as a counterclaim to defend itself in the event of any action to recover the debts incurred by our company). No goods may be returned by the client without the express prior written consent of our company. In the event of visible defects or missing products, that have been confirmed by us, ACIS shall replace the non-compliant items and/or the missing component, without the client being able to claim any compensation or cancel the order. The client must provide any supporting evidence as to the true nature of the noted defects, our company reserving the right to carry out, directly or indirectly, any checks or examinations on site, which the client accepts. Defects and damage to delivered products caused by abnormal warehouse and/or storage conditions on the client's premises, in particular while unloading, or in the event of an accident of any kind whatsoever that cannot be attributed to our company, shall not be covered by our company's guarantee.

Products sent to us for repair (with the exception of the cases set out in Article 9 below) must always be shipped at the expense of the client. Any request for repairs shall be subject to a quote, to be accepted in advance by the client.

**5.5. Suspension of deliveries:** In the event that an invoice is not paid in full by its due date, after

formal notice has remained ineffective for 48 hours, our company reserves the right to suspend any ongoing or pending delivery.

#### Article 6 - Transfer of risk

The risks of loss or damage shall be transferred to the client once the products are given to the carrier, regardless of any transfer of ownership and regardless of the order date and payment date. The client acknowledges that it is the responsibility of the carrier to make the delivery. ACIS shall be deemed to have fulfilled its obligation to deliver once it has handed over the products to the carrier, who accepts them without reservation. The client shall have no warranty claims against ACIS in the event that the products are not delivered or are damaged during shipping or unloading.

#### Article 7 - Transfer of ownership

The transfer of ownership of our products shall be suspended until the client has paid for them in full, in principal and accessories, even in the event that a payment extension has been granted. By express agreement, our company may, under this retention of ownership clause, exercise the rights it holds over any amounts outstanding, on all products in the possession of the client, these being deemed to be unpaid for, and our company may repossess or claim them as compensation for any unpaid invoices, without prejudice to its right to cancel any ongoing sales. Any deposit paid by the client shall be retained by ACIS as a fixed rate compensation fee, without prejudice to any other action that ACIS would be within its rights to bring against the client as a result.

In the event of failure to pay, the client shall refrain from reselling its stock proportionate to the quantity of unpaid products. It may not, in any way, pledge or grant securities over the products delivered by ACIS that remain unpaid. Our company may unilaterally, after sending formal notice, draw up an inventory or have an inventory drawn up, of the products delivered to the client that remain unpaid. As such, the client expressly undertakes, by agreeing to these terms and conditions, to grant free access to its warehouses and shops or other premises, making sure that the company is always able to identify its products. In the event that insolvency or liquidation proceedings are brought against the client, ongoing orders shall be cancelled automatically and our company reserves the right to claim the goods in stock. Consequently, the client undertakes to insure at its own expense, the products, for the benefit of ACIS, through an ad-hoc insurance policy, until full transfer of ownership takes place, and to show proof of this during delivery. Otherwise, ACIS would be within its rights to postpone delivery until this proof is obtained.

#### Article 8 - Technical characteristics and product safety

Our products are designed exclusively for family use (except for products for local authorities), under the responsibility of parents and/or legal guardians. Our products that involve, either during installation and/or commissioning, hydraulic and/or electrical connections (e.g. our Jet Vag products), must, in order to guarantee the safety of their final users, be installed by a person who is fully competent in terms of carrying out his or her trade, the usage rules set out in our documents and all security measures required by the regulations in force for this type of product.

Consequently, the client must ensure compliance, if the aforementioned products are resold, within the framework of its normal business activities, with the provisions described above. In particular, it must ensure, regardless of the distribution methods it intends to use, (e.g. online purchases), that the relevant safety measures are duly communicated regarding installation and/or commissioning for products that require hydraulic and/or electrical connections, in particular as part of its own Terms and Conditions of Sale. In the event of non-compliance with the aforementioned provisions:

- said products shall not be covered by the warranty as set out in Article 3 of these Terms and Conditions,

- and ACIS shall not be held liable for any damage whatsoever incurred by the end consumer as a result of the client not complying with the aforementioned safety rules.

In addition, any breach of the aforementioned provisions shall authorise ACIS to:

- hold the client liable and obtain compensation for any damage(s) incurred,

- as well as, if applicable, seek the termination of this contract.

By agreeing to these terms and conditions, the client declares that it has been fully and expressly informed of the fundamental nature of this obligation and of the consequences that may arise should it be breached. All our products comply with the safety standards in force. In order to continually improve the quality of our products, we reserve the right to modify the specifications and the characteristics of our products at any time. The photos of our products are not contractual. As our products are constantly changing, the company may change the technical composition and the characteristics of the listed products without notice, which are provided for information purposes only. The products that no longer feature in our range shall be replaced with an equivalent product.

#### Article 9 - Hidden defects

**9.1.** Hidden defects are defects resulting from faulty materials, design or manufacturing that affect the delivered products making them unfit for use.

**9.2.** Our warranty only applies to products:

- that have become the lawful property of the client;

- and that have been fully manufactured by our company.

A design flaw is not a hidden defect and clients are deemed to have been provided with all the technical information concerning our products.

**9.3.** The warranty of our company for hidden defects shall be valid for a period of two (2) years. This period shall be extended to five (5) years for resin motors only (excluding bearings and capacitors). This warranty shall run from the date that the final consumer purchased the product from our retailer. Our warranty shall cease to be valid:

- at the end of the aforementioned two- or five-year period depending on the nature of the

product in question,

- and also if the client has not informed us within twenty (20) clear days of an alleged defect being noted. The client must provide proof of the time at which this defect was noted.

**9.4.** The warranty for hidden defects shall be granted following:

- Receipt of the photocopied delivery note and invoice by ACIS,

- Sending of the return note to the client with ACIS' acceptance number,

- Pre-paid return shipping of the product, by the client,

- Inspection of the equipment in ACIS' workshops.

ACIS shall then decide if the product is defective.

**9.5.** Under the warranty for hidden defects, our company shall only be obliged to provide a replacement or repair, free of charge, of the defective goods and/or original parts recognised by us as defective, without the client being able to claim any damages, for any reason whatsoever. In the event that the client carries out work on the product, the guarantees are limited to providing the defective part and/or equipment, excluding any shipping, travel, and external work costs or any other damages.

Replacing defective products or parts shall not result in the warranty being extended.

**9.6.** The warranty for hidden defects shall not apply:

- in the event that our products have been used under unintended, bad or abnormal conditions of use or performance,

- in the event that our products have not been maintained or installed correctly, or in the event of faulty connections or normal wear and tear,

- in the event that the operating instructions provided by ACIS have not been respected,

- in the event of damage and/or wear and tear resulting from adaptation or special assembly, abnormal or otherwise, of our products, unless this has been carried out under our supervision,

- in the event of damage or an accident as a result of an impact, fall or a lack of and/or insufficient supervision or in the event that the product is transformed,

- in the event of negligence on the part of the client,

- in the event that the equipment is modified, repaired or dismantled, even partially, outside of our workshops or without the presence of one of our technicians,

- in the event that products requiring a hydraulic and/or electrical connection are installed or set up by a non-professional, in breach of the safety rules and the directions set out in Article 8 of these T&Cs,

- in the event of force majeure (as defined in Article 12 below).

Furthermore, the warranty shall be suspended until all late payments have been cleared. The client is expressly informed that this suspension shall not result in the duration of the warranty being extended. Application of the warranty shall not give rise to the payment of compensation.

#### **Article 10 - Intellectual and industrial property**

ACIS shall retain all intellectual and industrial property rights over the products. Consequently, the client shall refrain from modifying, masking or removing our distinctive marks displayed on our products. In addition, the client undertakes not to make any use of the technical documents (instruction manual, product sheet, photo, price, etc.) belonging to ACIS, in any way that is likely to infringe the intellectual or industrial property rights of our company, and undertakes not to disclose them to any third party. Breaching these obligations may lead to the lawful termination without prior notice, of ongoing orders and shall result in all sums owed being payable immediately by the client, without prejudice to any action for damages that we may bring.

#### **Article 11 - Hardship**

The statutory scheme governing hardship, under Article 1195 of the French Civil Code, shall apply in the event of a change in economic circumstances surrounding the conclusion of the sale, which has a significant negative effect on the balance of the sale.

#### **Article 12 - Force majeure**

Any event beyond the control of the parties, which they could not be reasonably expected to foresee and which they could not reasonably avoid or overcome, insofar as these events make it totally impossible to fulfil the obligations, shall be considered as force majeure or unforeseeable circumstances. The following shall be considered as cases of force majeure or unforeseeable events, absolving our company of its obligation to deliver within the originally scheduled lead times: strikes of all or part of the employees of our company or its usual carriers, fire, flood, war, production stoppages due to unforeseeable breakdowns, the inability to be supplied with raw materials, epidemics, road restrictions due to thawing ice, roadblocks, strike or disruption to the EDF-GDF electricity and gas supply, or any supply disruption that is not the fault of our company, as well as any other supply disruption that is the fault of our suppliers. In such circumstances, our company must notify the client in writing, specifically by fax or email, when the event occurs. The contract binding our company and client shall be lawfully suspended, without giving rise to compensation or damages, from the date on which the event occurs.

#### **Article 13 - Termination**

**13.1.** In the event of a breach of Articles 3 and 4 of these T&Cs and in the event of a late payment after the due date for products ordered by the client, the contract may be lawfully terminated by ACIS, with this breach giving rise to formal notice, without warnings or formalities.

**13.2.** Termination as a result of hardship (as defined in Article 11 above) may, notwithstanding the termination clause as a result of a failure by the client to fulfil its obligations, only take place one (1) month after sending formal notice by registered letter with confirmation of receipt to the other party.

**13.3.** Termination as a result of force majeure may, notwithstanding the termination clause as a result of a failure by the client to fulfil its obligations, only take place one (1) month after sending formal notice by registered letter with confirmation of receipt to the other party. This formal notice must specify the intent to apply this clause.

#### **Article 14 - Privacy policy**

The collection and processing of your personal data allows us to improve and personalise the services we offer. This information may be retained as evidence in compliance with legal and regulatory obligations (payment, dispute, after-sales service, etc.)

This information shall be used to process orders, manage returns, client relations, mail for tracking deliveries and marketing management.

In accordance with the French Data Protection Act (Informatique et Libertés) of the 6th January 1978, the client has the right to access, rectify and object to the processing of its personal data. The client may exercise its rights by writing to: ACIS, 15, rue des Marais - 44310 Saint Philbert de Grand Lieu, France. In accordance with current regulations, the request must be signed and accompanied by a photocopy of an identification document bearing the signature of the client, specifying the address to which the response must be sent. A response shall be sent to the client within two (2) months of receipt of the request.

ACIS undertakes not to transfer or sell any personal information of the client to third parties, nor to use this information for unauthorised purposes.

#### **Article 15 - Applicable law - Jurisdiction**

Any matter pertaining to these T&Cs, and the sales they govern, which is not covered by these contractual provisions, shall be governed by French Law, to the exclusion of any other law.

Any dispute about the application of these T&Cs, their validity, their interpretation, their execution, their consequences, their results and

sales contracts entered into by our company, or payment of the price, shall be brought before the commercial court sitting in the location of the registered office of our company, even in the event of the introduction of third parties or multiple defendants.

#### **Article 16 - Amendments to the T&Cs**

In light of changes to regulations, the marketing policy of ACIS and changes to products, ACIS reserves the right to amend these T&Cs at any time. The new T&Cs shall only apply to sales made following the amendment(s).
